DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17, 19-20, 22, 25-27 and 32 are rejected under 35 U.S.C. 102(b) as being anticipate by Takenaka et al. U.S. Patent No. 5,404,086.

Regarding claim 17, 19, and 32, Takenaka et al discloses a legged mobile robot having a body and a plurality of legs connected to the body through a joints and having a foot connected to a distal end of the leg through a second joint, and an elastic member (element 100) that contracts in response to a load and is installed at a position between the second joint and a floor contact end of the foot; and a displacement sensor (see, for example, claim 10), and means to measure the floor reaction force (col. 4, line 4).

Regarding claims 19-20, and 22 it appears that the sensors 36 are sealingly housed in the elastic member 100.

Regarding claims 25-27, Takenaka teaches the use of means to detect the error between an estimated and a detected value (see for example, claim 21).

Art Unit: 2855

3. Claims 18, 21, 23-24, and 28-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
